<p>World Stockmarkets have been rising ever since the post GFC low of March 2009, the U.S. in particular. And whilst all investors enjoy rising Stockmarkets, only those who are ready will be able to protect their capital and profit when markets fall. So to find out what to do when the music stops, come and hear Alan Hull run through his checklist of strategies for each stage of a correction. Learn how to hedge your income stocks, hang on to your real estate investments and even how to profit by short selling.</p>
